

SL30W Wheel Loader

The SL30W loader is a robust construction vehicle designed for heavy-duty material handling. It excels in loading, transporting, and dumping tasks with its powerful engine and high-capacity bucket.

Overview

Built for Heavy-Duty Performance

The SL30W Loader is a robust construction vehicle engineered for maximum efficiency in material handling. Designed to excel in mining, construction, and agricultural environments, it offers a powerful engine paired with a high-capacity bucket. The unit prioritizes operator performance through an ergonomic cabin design while ensuring long-term reliability with durable structural components.

Key Performance

Primary Applications

Construction, Mining, Agriculture, Material Handling

Technical Features

Core Equipment Features

- Hydraulic steering system
- High-capacity material bucket
- Reliable braking system
- Ergonomic operator cabin
- Easy-maintenance component layout
