

Sleeve Anchor for Concrete

The sleeve anchor is designed for reliable anchoring in concrete, brick, and block. When tightened, the expansion sleeve provides a secure hold, making it suitable for attaching fixtures and equipment to masonry surfaces.

Product Overview

Versatile Anchoring Solution

The sleeve anchor is a versatile fastener engineered for reliable anchoring in concrete, brick, and block base materials. It utilizes an expansion sleeve mechanism that provides a secure, dependable hold once tightened. Designed for professional use, it is ideal for attaching fixtures, brackets, and equipment to masonry surfaces.

Technical Specifications

Corrosion Resistance

Zinc-plated

Anchor Components

- Threaded stud
- Expansion sleeve
- Nut
- Washer

Material	Zinc-plated steel
Compatible Base Materials	Concrete, Brick, Block
Installation Mechanism	Expansion sleeve triggered by tightening the nut
