

Sleeve Anchor for Concrete

This sleeve anchor is designed for securely attaching objects to concrete, brick, or block. As the bolt is tightened, the sleeve expands, creating a strong grip against the surrounding material.

Product Overview

Heavy-Duty Sleeve Anchor

The Sleeve Anchor for Concrete is a professional-grade, heavy-duty fastener engineered for secure attachment to concrete, brick, and block surfaces. Featuring a robust design with a threaded bolt and expanding metal sleeve, it provides exceptional pull-out strength and vibration resistance. This versatile component is essential for demanding applications, including securing heavy machinery, industrial shelving, and structural supports.
