

Sleeve Anchor with Hex Bolt, Cone Nut and Washer

Sleeve anchors are designed for fastening objects to concrete or masonry. Tightening the bolt draws the cone nut into the sleeve, expanding it for a strong grip.

Product Overview

Engineered assembly for maximum expansion and gripping force in masonry.

Professional Grade Sleeve Anchors

These versatile sleeve anchors are precision-engineered for secure fastening applications in concrete, brick, and masonry. The assembly consists of a high-strength hex bolt, a cone nut, a washer, and an expansion sleeve that provides reliable grip when tightened. Available in a wide variety of dimensions and load-bearing capacities, these anchors are ideal for medium to heavy-duty construction projects where stability and safety are paramount.

Components

Hex Bolt, Cone Nut, Washer, Expansion Sleeve

Technical Specifications

Available Diameter Range

- 8mm
- 10mm
- 11mm
- 12mm
- 14mm
- 16mm

Material Grades

4.8 • 5.6 • 6.8
