

Slewing Jib Crane

This jib crane is suitable for short-range and intensive lifting tasks. It is widely used in workshops, warehouses, docks and other fixed places.

ADDITIONAL IMAGES

Product Overview

A robust, slewing jib crane designed for versatile material handling applications.

Versatile Industrial Lifting Solution

This slewing jib crane is a high-performance solution designed for short-range and intensive lifting operations in workshops, warehouses, and docks. Engineered for durability, it features a hollow steel cantilever structure that provides a high strength-to-weight ratio for efficient load handling. With customizable rotation angles and support for electric or manual hoists, it offers the flexibility required to meet diverse industrial material handling needs.

Technical Specifications

Available Rotation Angles

- 180°
- 270°
- 345°
- 360°

Operation Modes

Manual • Electric

Load Capacity Range

0.5t, 1t, 2t, 3t, 5t, 10t, 16t, 20t

Compatible Hoist Types

Electric Wire Rope, Electric Chain, Manual

Features

Core Advantages

- Seamless pipe columns for structural integrity
- I-beam or KBK beam main beams
- Special engineering plastic wheels with rotary bearings for reduced abrasion
- Smooth shuttle movement along I-shaped beams
- Customizable lifting height and capacity options
