

Slider Design Mobile Phone

This mobile phone features a slider design with a reflective screen and metallic trim. The upper portion slides to reveal internal components and a front-facing speaker.

Product Overview

Classic Slider Design

This mobile phone features a distinctive slider mechanism, blending classic form with modern functionality. Designed for reliability and ease of use, the device includes a metallic trim and a reflective screen, making it a stylish choice for professional communication needs. Its compact, sliding architecture provides protection for the keypad while maintaining a sleek profile.
