

Sliding Head Steel Bar Clamp

This heavy-duty steel bar clamp has a sliding head for versatile clamping. It is made with a durable steel bar and cast iron jaws to provide high clamping force and stability.

Product Overview

Sturdy and Durable Clamping Solution

This heavy-duty steel bar clamp is engineered for versatility and high performance in demanding workshop environments. Featuring a robust sliding head design, it allows for rapid size adjustments, ensuring efficient workflow for both woodworking and metalworking tasks. The combination of high-grade steel and cast iron ensures maximum stability and consistent clamping force during operation.

Construction

Materials

Steel Bar, Cast Iron Jaws

Key Features

Primary Attributes

- Sliding head design for quick adjustments
- Threaded spindle for precise pressure control
- Ergonomic handle for comfortable use
- High-force clamping capability

Application

Suitable Industries

Woodworking • Metalworking • General Clamping
