

Slim Display Cooler with Light Box

This slim display cooler features built-in LED lighting and a front-loading water tray. It maintains a consistent temperature between 2 and 8 degrees Celsius.

Product Overview

Professional Slim Display Cooler

This slim, upright display cooler is engineered to maximize retail visibility while optimizing floor space. Featuring a dedicated top light box for customizable advertising, a full-length vertical LED system, and double-layer glass doors, it is designed to showcase beverages effectively. With an adjustable temperature range and a robust, insulated design, it provides a reliable, energy-efficient refrigeration solution for supermarkets and retail environments.

Technical Specifications
