

# Slim Profile LED Panel Light

This high-efficiency LED panel light is designed for uniform and bright illumination. It features a slim profile and durable construction, making it suitable for various indoor applications.

## ADDITIONAL IMAGES

## Overview

### Professional Slim Profile LED Panel

This high-efficiency LED panel light is engineered for uniform, bright, and energy-saving illumination in diverse indoor environments. With a slim profile and durable aluminum construction, it is an ideal solution for offices, classrooms, retail spaces, and residential settings. Designed for longevity and reliability, this fixture ensures minimal maintenance and consistent performance.

## Technical Specifications

### Luminous Efficacy

**100 lm/w**

Luminous Efficacy

Input Voltage	AC85-265
Color Temperature (CCT)	3000-6000K
CRI (Ra)	80
Driver Type	Isolate or Non-Isolate

## Physical & Durability

Lamp Body Material	Aluminum
Operating Temperature	-20 to 50
Working Lifetime	35000 Hours
Installation	Embedded

## Compliance & Usage

### Warranty

3 Years

### Recommended Applications

- Residential/Home
- Office
- Classroom
- Supermarket
- School

### Certifications

CE, EMC, LVD, RoHS
