

Slip-On Wire-Wrap Pipe Base Screen

The slip-on wire-wrap pipe base screen is designed for versatile performance without hindering production efficiency. These screens can be tailored with specific outside diameters, materials, and screen slot sizes to meet unique downhole requirements.

Product Overview

Versatile Filtration Solutions

The Slip-On Wire-Wrap Pipe Base Screen is engineered to provide high-performance filtration in demanding down-hole environments. Its robust construction ensures structural integrity while effectively preventing unwanted particles from entering the flow. Designed for versatile operational use, these screens offer a slip-on configuration that simplifies installation and maintenance, significantly reducing downtime.

Key Features

Slip-on design, High-flow rate, Corrosion-resistant, Customizable

Technical Customization

Customization Options

- Outside Diameter
- Material Type
- Screen Slot Size

Industrial Applications

Primary Applications

Water Wells • Oil Production • Gas Production
