Product Overview

Versatile Filtration Solutions

These slip-on wire-wrapped screens are engineered for ultimate versatility without compromising production performance. Featuring a durable, helically wrapped wire design, they provide consistent filtration for water, oil, and gas applications. The customizable nature of the materials and dimensions ensures optimal performance in diverse downhole conditions.

Technical Specifications

Key Design Features

- Slip-on design for easy installation
- Continuous slot opening
- High open area for efficient fluid flow
- Corrosion-resistant materials

Construction Method

Helically wrapped profiled wire on longitudinal support rods

Customizable Parameters

Outside Diameter, Material Type, Slot Size

Applications

Industry Applications

Water Wells • Oil and Gas • Chemical Industry • Petrochemical Industry
