

Slotted Pan Head Screw with CD Lines

This is a special slotted large pan head screw designed for electrical equipment, featuring CD lines on the head. It measures M3*8, has a nickel-plated surface treatment, and is made of carbon steel.

Product Overview

Precision Slotted Pan Head Screw

This precision-engineered screw features a large pan head with distinct concentric CD-like lines, providing both enhanced grip during installation and a refined aesthetic finish. Designed with a standard slotted drive, it is compatible with flathead screwdrivers for reliable assembly. These fasteners are built for durability and are ideal for diverse applications, including electronics, machinery, and general hardware assembly.

Technical Specifications

Head Type	Large Pan Head with CD Lines
Drive Style	Slotted
Surface Features	CD-like lines, Grooved head, Slotted
