

Slotting Machine

This slotting machine is a professional-grade tool designed for creating precise slots in various materials. It operates on a voltage of 220-240V at 50Hz and has a no-load speed of 7000r/min.

Overview

Professional Slotting Efficiency

The HM61251 slotting machine is designed for rapid, one-time molding of channels in various wall materials including red brick, hollow brick, and cement. By eliminating the need for auxiliary tools or secondary processing, this machine delivers high efficiency and precision for industrial electrical and plumbing installations. Its unique design minimizes dust and allows for easy operation by a single user, significantly reducing labor costs and time.

Technical Specifications

Input Power

2400 W

Input Power

Operating Voltage	220-240V / 50Hz
No-load Speed	7000 r/min
Blade Diameter	125 mm

Performance Features

Rotation Flexibility

- 45 degrees
- 180 degrees
- 360 degrees

Compatible Materials	Red Brick, Sand Brick, Hollow Brick, Aerated Brick, Cement Wall
Tooling Durability	Strength alloy steel tool head, polishable/reusable over 40 times

Certifications & Compliance

Certifications

CE Certified • Industrial Grade
