Product Overview

Precision Slotting Performance

This high-performance alloy saw blade is engineered specifically for precision slotting applications. Designed for durability and consistent efficiency, these blades offer a wide range of sizes and tooth configurations to meet diverse industrial cutting requirements. They are ideal for achieving clean, accurate slots across various materials.

Technical Specifications

Available Hole Diameters	25.4mm, 30mm
Outer Diameter Range	7 inches to 18 inches
Tooth Count Range	18T to 120T
