Product Overview

Premium Slow Juicing Technology

The SJ150L is a high-efficiency slow juicer designed to maximize nutrient and enzyme retention through a gentle cold-press squeezing process. By operating at low speeds, it significantly minimizes heat and oxidation, ensuring higher juice yields and longer-lasting, fresher beverages. With its user-friendly vertical design, quiet operation, and dishwasher-safe components, it is an ideal solution for daily health-conscious juicing in demanding environments.

Technical Specifications

Suitable Ingredients

- Fruits
- Vegetables
- Leafy greens
- Nuts

Extraction Method

Slow-speed cold press masticating

Key Advantages

High Nutrient Retention, Minimal Oxidation, Quiet Operation, High Juice Yield

Design & Convenience

Cleaning and Maintenance

Easy Assembly • Dishwasher-Safe Parts

Performance Metrics

1 count

Large feeding chute
