

Slow Juicer for Fruits and Vegetables

This slow juicer is designed for efficient juice extraction from fruits and vegetables. It features a low-speed auger system to minimize oxidation and preserve nutrients.

Product Overview

Efficient Extraction Technology

This slow juicer is engineered for high-efficiency extraction from a wide variety of fruits and vegetables. Utilizing a precision low-speed auger system, it significantly minimizes oxidation to ensure better preservation of essential nutrients and enzymes. Its compact, user-friendly design makes it an ideal solution for consistent, high-quality juice production.

Technical Specifications

Primary Application

Fruits • Vegetables

Extraction Method

Low-speed auger system

Design Features

Compact Design, Separate Pulp Collection, Separate Juice Collection
