Product Overview

Premium Cold Press Technology

This slow-speed juicer utilizes cold-pressing technology to extract maximum nutrition, vitamins, and antioxidants from fruits, vegetables, and soybeans. By operating at a gentle 60RPM, it prevents the cellular structure of food from breaking down and significantly reduces oxidation. Designed for both health and convenience, this appliance is easy to assemble, features a durable DC motor, and includes safety mechanisms for reliable daily use.

Technical Specifications

Operating Speed

60 RPM

Rotation Speed

Safety Features

- Overheat protection thermostat
- Safety lock system
- Anti-drop juice spout
- Steady suction buttons on base

Safety and Materials

Food grade, BPA free
