

Slow Masticating Juicer for Fruits and Vegetables

This slow juicer efficiently extracts juice from fruits and vegetables, preserving nutrients and enzymes. Its low-speed operation minimizes heat and oxidation, resulting in higher juice yield and enhanced flavor.

Product Overview

High-Efficiency Slow Masticating Juicer

This slow masticating juicer is engineered to extract maximum juice yield while preserving the natural flavor and essential nutrients of your fruits and vegetables. By operating at a lower speed, it minimizes heat and oxidation throughout the process, ensuring a higher quality result. Designed with convenience in mind, the unit features detachable components for effortless cleaning and a quiet motor for a pleasant juicing experience.

Technical Specifications

Voltage	220-240V~50/60Hz
Power Rating	200 W

Capacity

Capacity Metrics

0.8 L

Juice Cup Capacity

0.8 L
