

Slow Masticating Juicer for Fruits and Vegetables

This slow juicer is designed for extracting juice from various fruits and vegetables. It utilizes a low-speed auger to minimize heat and oxidation, which helps in preserving the nutrients.

Product Overview

Slow Masticating Juicer

This slow masticating juicer is engineered for efficient extraction of juice from a wide variety of fruits and vegetables. By utilizing a low-speed auger, the process minimizes heat buildup and oxidation, helping to preserve essential nutrients in your final product. The unit is constructed with durable, food-grade materials and is designed for straightforward assembly and cleaning.

Technical Specifications

Included Components

- Feeding chute
- Juicing chamber
- Pulp container
- Juice container

Material Safety	Food-grade materials
Extraction Technology	Low-speed auger mastication

Usability

Maintenance

Easy to assemble • Easy to disassemble
