

Slow Masticating Juicer with Wide Chute

This slow juicer features slow extract technology at 75rpm, yielding up to 55% more juice than traditional juicers. Its wide 76mm feeding hole accommodates larger pieces, and it functions as a juicer, meat grinder, sausage stuffer, and dough kneader.

Product Overview

Efficient Slow Masticating Juicer

This professional-grade slow masticating juicer features a vertical design optimized for efficiency and ease of use. Equipped with a wide feeding chute, it allows for faster processing of whole fruits and vegetables. The transparent juicing chamber offers full visibility, while the dual-container system ensures seamless separation of juice and pulp.

Performance

Juicing Mechanism	Slow Masticating Screw
Chute Type	Wide Feeding Chute

Design

Key Features

- Vertical space-saving design
- Visible juicing process
- Separate pulp collection
- Intuitive operational controls

Build Materials	Transparent Chamber, Silver Base, Black Accents
