

Slurry Pump Shaft Sleeve for Warman Pumps

This slurry pump shaft sleeve is compatible with Warman pumps. It is constructed from hard alloy metal or with an optional rubber liner for abrasion and corrosion resistance.

Product Overview

Precision Engineered Slurry Pump Component

This shaft sleeve is specifically designed to provide superior protection for slurry pump shafts in demanding industrial environments. By utilizing high-grade abrasion and corrosion-resistant alloys and rubbers, it ensures extended service life and reliable operational performance. Our components are manufactured to maintain tight tolerances, helping to minimize maintenance downtime and optimize overall pump efficiency.

Materials and Compatibility

Available Materials

A05 High Chrome Alloy, A07 High Chrome Alloy, A49 High Chrome Alloy, R08 Natural Rubber, R26 Natural Rubber, R33 Natural Rubber, R55 Natural Rubber

Manufacturing

Service Capabilities

- OEM custom requirements fulfillment
- Precision casting
- Advanced material sourcing

Product Range

Associated Pump Components

- Impellers (Open/Closed)
- Liners (Throat/Front/Back/Cover/Frame Plate)
- Shaft and Bearing Assembly
- Volute and Bowl
- Expeller and Rings
- Stuffing Box
