

# Slurry Pump Wear-Resistant Impeller

This slurry pump impeller is engineered for high efficiency. Its modular design facilitates easy replacement of spare parts and ensures long-term performance with minimal maintenance.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Slurry Handling Performance

The H-series is a robust, horizontal cantilevered centrifugal pump specifically engineered for handling high-density, abrasive, and corrosive slurries. Its advanced design ensures long service life and high efficiency even in the most demanding environments such as mining, metallurgy, and power generation. Featuring modular components and interchangeable liners, these pumps provide consistent performance with simplified maintenance cycles.

## Technical Specifications

### Compatible Drive Types

- V-belt drive
- Gear reducer drive
- Fluid coupling drive
- Frequency conversion drive

<b>Pump Type</b>	Horizontal, cantilevered centrifugal dredge slurry pump
<b>Shaft Seal Types</b>	Packing seal, Expeller seal, Mechanical seal

## Design Features

<b>Discharge Positions</b>	8 positions
<b>Bearing Maintenance</b>	Cylindrical structure with grease lubrication; designed for easy adjustment and removal

## Application Suitability

### Common Pumped Media

- Finished ores
- Refuse ores
- Ashes and cinders
- Cements
- Mud
- Mineral stones

### Industries Served

Metallurgy, Mining, Coal, Power, Building Materials
