

Small Displacement Four-Stroke Engine

This compact auto engine is suited for small displacement applications. It features a recoil starter and appears to be a four-stroke design.

Overview

Compact Four-Stroke Power Solution

This small displacement four-stroke engine is engineered for versatility and reliability in demanding environments. Designed for efficiency, it features a robust construction suitable for a wide range of applications, including small machinery, generators, and light-duty vehicles. Its compact footprint and manual recoil starter system make it an ideal choice for equipment requiring dependable, easy-to-maintain power.

Technical Specifications

Rated Power

6.5 HP
Horsepower

Engine Type	Four-stroke
Starting System	Recoil starter
Construction	Durable Materials, Compact Design
