Product Overview

High-Performance Small Engine Carburetor

This replacement carburetor is engineered for small engine applications, specifically tailored for garden tools and lawnmowers. Constructed from durable metal, likely an aluminum alloy, it ensures a long service life and reliable operation under demanding conditions. The design features a precise air-fuel mixing mechanism, complete with a primer bulb and adjustable throttle controls to ensure optimal engine performance and efficient combustion.

Technical Specifications

Material	Metal (Aluminum Alloy)
Carburetor Type	Diaphragm-type
Key Components	Primer Bulb, Adjustable Mixture Screw, Throttle Mechanism, Mounting Flanges

Compatibility & Use

Suitable Applications

- Lawnmowers
- Garden Power Tools
- Small Engine Equipment

Installation	Yes
