

# Small Peanut Butter Production Line

This peanut butter production line is mainly used for making peanut butter, almond butter, sesame butter and so on. The line includes roasting, cooling, peeling, grinding, mixing, and storage.

## ADDITIONAL IMAGES

## Overview

Stainless steel machinery components ensure hygiene and durability during the production process.

Integrated system capable of processing multiple nut varieties including almond and sesame.

## Professional Nut Butter Processing Line

This automated production line is designed for the efficient manufacturing of peanut, almond, and sesame butters. The end-to-end system manages the entire process from roasting and peeling to fine grinding, mixing, and degassing. Built with high-quality stainless steel, it ensures durability and strict hygiene standards for small to medium-scale food production operations.

### Supported Products

Peanut Butter, Almond Butter, Sesame Butter, Cashew Butter, Pecan Butter

## Technical Specifications

### Production Line Components

Component	Power	Dimensions
Feeding Machine	0.55 kW	700*700*800 mm
Continuous Roaster	24 kW	3000*1200*2600 mm
Peeling Machine	0.74 kW	1100*350*1100 mm
Grinding Machine	5.5 kW	900*350*900 mm
Mixing Tank	2.2 kW	200 L

Grinding Fineness	7 $\mu$
Max Grinding Temperature	68 °C
Roasting Conditions	200-210 °C for 20-30 minutes

## Operational Information

### After-Sales Support

- 1-year warranty
- Lifelong maintenance
- 24/7 online technical support
- Email response within 12 hours
