

Smart Access Control Card

The smart access control card facilitates secure entry through electronic authentication. It is designed for use in access control systems, ensuring only authorized personnel can gain entry.

Overview

Smart Access Control Solution

The Smart Access Control Card is designed for secure and efficient facility entry management. Engineered for durability and reliability, this card integrates seamlessly into modern security infrastructures. It serves as a critical component for professional environments requiring robust access control solutions.

Physical Properties

Material Construction	High-durability plastic
-----------------------	-------------------------

Certifications

Compliance Standards	ISO 9001, CE Certified
----------------------	------------------------

Performance

Key Features

- Encrypted data storage
- Contactless scanning
- Long-range durability
- Anti-tamper security
