

Smart Air Purifier with Three-Layer Filtration

This smart air purifier is engineered to deliver cleaner air within homes. It utilizes a three-layer filtration system, incorporating a primary filter, a high-efficiency filter, and an activated carbon filter to eliminate dust, pollen, smoke, and various airborne particles.

Product Overview

Clean Air Innovation

This smart air purifier features an advanced three-layer filtration system designed to effectively remove airborne particles such as dust, pollen, and smoke. With an integrated real-time air quality sensor, the device automatically adjusts fan speeds to maintain optimal conditions. It offers seamless connectivity via mobile app for remote monitoring and filter life management.

Technical Specifications

Filtration System

- Primary filter
- High-efficiency filter
- Activated carbon filter

Smart Capabilities

Real-time monitoring, Auto fan adjustment, Remote app control, Filter life tracking

Performance

Operation

Quiet operation suitable for various room sizes
