Product Overview

Smart WiFi Body Composition Scale

This advanced smart scale features high-precision strain gauge sensors and an ITO-coated tempered glass platform to provide comprehensive body composition analysis. Equipped with integrated WiFi connectivity and TUYA solution chips, it automatically synchronizes health data to the Smart Life app without requiring manual activation. Designed for family use, the platform supports multiple profiles and delivers accurate measurements for body weight, fat, muscle, and more.

Technical Specifications

Maximum Capacity

180 kg

Weight Capacity

Dimensions

300 x 300 x 21 mm

Power Requirements

3 x AAA batteries (included)

Smart Connectivity

WiFi, TUYA App, Smart Life App

Features

Key Functional Features

- Auto step-on and auto-off
- Overload indication
- Low battery indicator
- Multiple-user profile support
- Automatic data synchronization
- White LED digital display

Design & Build

Build Quality

6mm ITO tempered glass platform
