

# Smart Electric Kettle with WiFi Control

This electric kettle features WiFi connectivity for remote control of temperature and boiling time. It allows users to set precise temperatures and keep-warm times via a smartphone app.

## Product Overview

### Smart Connectivity and Precise Control

This smart electric kettle integrates seamlessly into modern kitchens with full WiFi connectivity and Tuya app support. Designed for precision, it allows users to set exact temperatures and manage keep-warm schedules directly from a smartphone. The kettle features a patented easy-filling lid, a 1.7L capacity, and dynamic LED lighting that shifts colors to indicate different temperature stages.

## Technical Specifications

### Power Rating

**1850 W**

Minimum Power

**2200 W**

Maximum Power

### Capacity

1.7 L

## Smart Features

### App Functions

- Temperature setting
- Keep warm time setting
- Timer control

### Connectivity

WiFi, Tuya App

## Operating Modes

### Preset Temperatures
