Overview

Comprehensive Home Automation Suite

This smart home automation and monitoring suite provides a fully integrated solution for managing your home environment. The system includes a central intelligent gateway, smart outlets, and a variety of sensors designed to enhance security and energy management. By combining occupancy detection, environmental monitoring, and intrusion alerts, this suite offers a seamless experience for remote home control and peace of mind.

System Components

Included Devices

- Intelligent Gateway
- Smart Outlet
- Smart Doorbell
- Thermometer
- Door Sensor
- Window Sensor
- Somatosensor

System Features

Gateway Functionality	Night Light, Offline Operation, Centralized Communication, Device Hub
Supported Device Types	IP Cameras, Lights, Outlets, Power Strips, Sensors, Doorbell

Security & Monitoring

Security Alerts

- Audible alarm via gateway
- Visual alarm via gateway
- Mobile app notifications
- One-button alert mode activation

Sensor Applications

Intrusion Detection • Occupancy Detection • Temperature Monitoring
