

Smart Home Curtain Motor

This smart curtain motor automates existing curtains for ease of use. It features app control, timing, and automatic stop.

ADDITIONAL IMAGES

Product Overview

Compact smart motor designed for seamless integration with existing track systems.

Smart Curtain Automation

This smart curtain motor transforms traditional manual curtains into an automated system. It provides versatile control options including remote operation, smartphone app integration, and manual triggering. Designed for reliability, the system includes safety features such as automatic stop upon detecting resistance.

Connectivity & Control

Wireless Frequency	433MHz
Control Methods	Tuya APP, Wireless Remote, Manual Hand-Pull, Timed Automation

Key Features

Functional Highlights

- Scheduled open and close timing
- Automatic operation on manual pull
- Automatic stop protection on resistance
- Multi-motor synchronization support
