

Smart LED Light Bulb with Wireless Connectivity

This smart LED bulb is designed for modern lighting applications. It features integrated Wi-Fi and Bluetooth connectivity, enabling seamless control and automation.

Product Overview

Smart LED Lighting Solution

The SLB-A60 is a versatile smart LED bulb designed for modern lighting automation. It integrates advanced Wi-Fi and Bluetooth connectivity, allowing for seamless control and voice assistant compatibility. With adjustable brightness and color temperature, this energy-efficient bulb offers a customized lighting experience while reducing maintenance needs.

Technical Specifications

Key Features

- Voice control support
- Adjustable brightness
- Color temperature control
- Energy efficient design

Connectivity Technology	Wi-Fi, Bluetooth, Direct-connect, Mesh technology
Socket Compatibility	E26/E27

Performance

Connection Performance

1 Mesh

Signal Stability
