Overview

Intelligent Smart Robot Floor Cleaner

This advanced robot floor cleaner utilizes VSLAM algorithm positioning and intelligent visual technology to map your home in real-time, ensuring efficient and comprehensive cleaning. Designed for versatility, it features multiple cleaning modes including zigzag and edge cleaning, suitable for various floor types like wood, tile, and marble. With remote Tuya APP control, users can easily schedule cleanings, monitor progress, and adjust settings, providing a seamless, hands-free maintenance solution for any modern home.

Cleaning Capabilities

Intelligent safety sensors and multi-surface cleaning capabilities.

Cleaning Modes	Zigzag Cleaning, Edge Cleaning, Wet Wipe Mode, Dry Wipe Mode
Compatible Surfaces	Wooden Floors, Ceramic Tile, Laminate Floors, Marble

Smart Features

Advanced VSLAM navigation and Tuya app integration for customized cleaning.

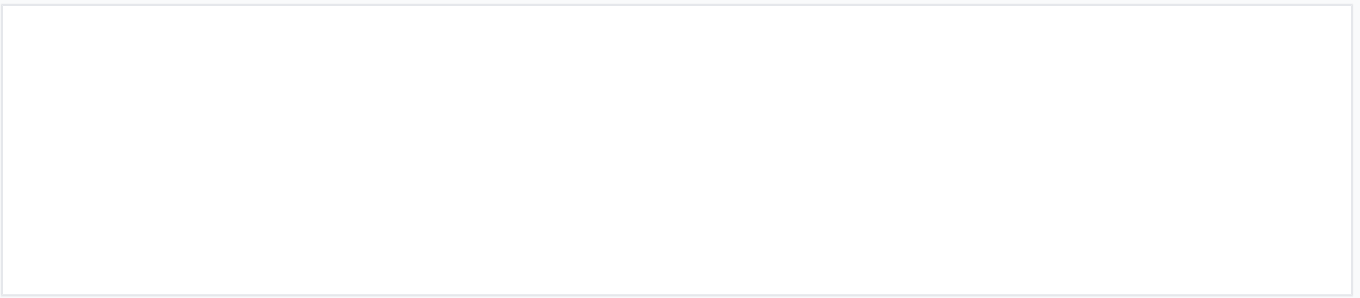

Navigation Technology

- VSLAM Algorithm Positioning
- Intelligent Visual Technology
- Wide-Angle Tracking
- Real-time Room Mapping

App Connectivity

Tuya APP

Hardware & Design

Visual technology and square-design benefits for corner cleaning.

Safety & Protection

- Anti-drop Sensors
- Intelligent Escape Mode
- Buffer Collision Avoidance
- Automatic Water Pump Shut-off

Mechanical Design

Square appearance for effective corner cleaning
