

Smart Self-Priming Jet Pump with Digital Display

This smart self-priming jet pump is designed for efficient water pumping. It features an integrated digital display for monitoring and ensuring reliable water pressure and flow in various applications.

Overview

Smart Self-Priming Jet Pump

This smart self-priming jet pump is engineered for efficient water management and reliable pressure delivery. It features an integrated digital display that allows for real-time monitoring and precise control of pump operations. Built with a durable stainless steel body, it is designed for continuous service in demanding environments.

Operating Conditions

Liquid Temperature

0 °C

Min

60 °C

Max

Max Ambient Temperature

40 °C

Maximum Pressure

10 bar

Technical Specifications

Duty Cycle

S1 Continuous Service

Compatible Liquids

Clean liquids, Non-aggressive, No suspended solids

Features

Key Features

- Self-priming capability
- Integrated digital display
- Stainless steel pump body
- Robust motor housing
