

Smart Sensor Stainless Steel Trash Can

This trash can is made with stainless steel. It features hands-free operation and intelligent waste management.

Product Overview

High-end 410 stainless steel smart sensor trash can for modern spaces.

Smart Stainless Steel Waste Management

This high-end, luxury smart trash can is constructed from thickened 410 stainless steel, offering exceptional durability and corrosion resistance. Featuring intelligent induction technology, it provides a seamless, hands-free experience with a rapid 0.2-second response time. Designed for modern living and office environments, it combines a sleek, space-saving profile with practical features like a sealed deodorant system and quiet, soft-closing operation.
