

Smart Stainless Steel Trash Can with Automatic Lid

This smart trash can is constructed from stainless steel. It features an automatic lid opening mechanism for touchless waste disposal.

Product Overview

High-end stainless steel smart trash can showing design and metallic finishes.

Smart Touchless Waste Solution

This smart stainless steel trash can provides a touchless waste disposal experience designed for hygiene and convenience. It features a responsive 0.2-second induction start and a 25cm sensor range, combined with a quiet, automatic closing mechanism. Constructed from thickened 410 stainless steel with IPx5 waterproofing, this unit offers exceptional durability, rust resistance, and an integrated deodorant system for a cleaner environment.
