Product Overview

Advanced Purification for Healthier Spaces

This smart air purifier combines True HEPA filtration with UV-C sterilization and plasma generation to ensure maximum air purity. Designed for rooms between 11m² and 19m², it effectively removes over 99.97% of dust, allergens, and airborne pollutants. With intuitive touch controls and an automated air quality index display, it offers both simplicity and sophisticated environmental monitoring.

Performance Specifications

Fan Speed Settings

- Low
- Medium
- High

Filter Efficiency	99.97 %
