

Smart WiFi Power Strip with USB Charging Ports

This indoor smart power strip features individually controlled WiFi outlets and always-on sockets, along with USB charging ports. It is equipped with overload and surge protection for connected devices.

Product Overview

Smart WiFi Power Strip with USB

This indoor IP20 smart power strip integrates seamless WiFi connectivity with versatile power options for modern home and office environments. It features three independently controllable outlets, one always-on outlet, and three high-speed USB charging ports, all managed through the Smart Life or Tuya Smart app. Enhanced with integrated surge and overcurrent protection, this device offers both safety and remote management capabilities.
