

Smart WiFi Socket with Dual USB Charging Ports

This smart socket allows for remote control of connected appliances through a smartphone application. It is equipped with dual USB ports for charging mobile devices.

Overview

Smart Connectivity for Modern Homes

This smart WiFi-enabled 13A wall socket seamlessly integrates remote control and convenience into your living space. Featuring dual integrated USB charging ports, it eliminates the need for bulky adapters, allowing you to charge mobile devices directly from the wall. With advanced app-based control, users can easily manage connected appliances, set schedules, and monitor energy usage from anywhere.

Technical Specifications

Rated Current	13 A
