

SMT 24mm Tape Feeder for Surface Mount Machines

This SMT tape feeder is designed for use with surface mount machines. The 24mm feeder ensures precise and reliable component placement during the SMT assembly process.

ADDITIONAL IMAGES

Product Overview

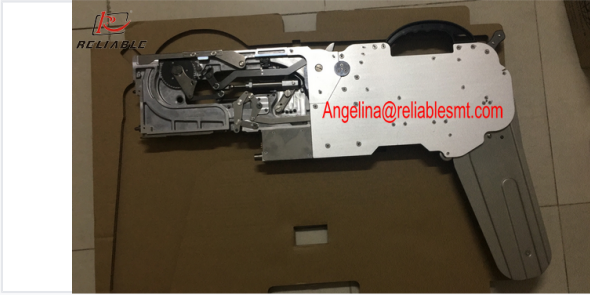

Robust construction ensures durability in continuous production environments.

High-Precision Tape Feeder

This original tape feeder is precision-engineered for automated surface mount technology assembly lines. Designed for reliable component feeding, it ensures high-speed, accurate placement to optimize production efficiency and reduce manufacturing downtime. Built for demanding industrial environments, this unit is a vital component for maintaining high-quality output in electronic assembly processes.

Technical Specifications

Professional-grade 24mm tape feeder for high-speed surface mount assembly machines.

Precision-engineered mechanism for accurate component feeding.

Tape Width	24 mm
Supported Feed Pitch Variants	8*2mm, 8*4mm, 8mm, 12mm, 16mm, 24mm, 32mm, 44mm, 56mm

Compatibility

Supported Machine Series

- Samsung CP40
- Samsung CP45
- Samsung CP60
- Samsung SM320
- Samsung SM321
- Samsung SM421
- Samsung SM471
- Samsung SM481
- Samsung SM482
