

SMT 44mm Feeder for CP45FV Pick and Place Machines

This SMT feeder is designed for use with Samsung CP45FV pick and place machines. It is configured to handle 44mm components, ensuring accurate and reliable delivery.

Product Overview

Precision-engineered 44mm feeder designed for reliable component delivery.

Precision SMT Component Feeding

This 44mm feeder is a precision-engineered component designed specifically for seamless integration with high-speed pick and place machines. Constructed from durable, high-quality materials, it ensures consistent and reliable component delivery during automated PCB assembly. Its robust design is optimized for demanding SMT production environments to maintain optimal manufacturing efficiency.

Compatibility

Compatible Machine Series

CP40, CP45, CP45FV, CP60

Technical Specifications

Supported Tape Widths

- 8*2mm
- 8*4mm
- 8mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Feeder Width

44 mm
