

SMT Belt for Yamaha Pick-and-Place Machines

This SMT belt is designed for use in Yamaha pick-and-place machines. It ensures reliable component transfer during surface mount technology (SMT) assembly.

Product Overview

High-Performance SMT Belt

This high-quality SMT belt is designed for precision pick-and-place machinery, ensuring reliable operation and consistent performance. Available in original new, used, and copy new conditions, it offers a competitive solution for maintenance and repair needs. Built for durability, this component meets strict quality assurance standards to keep your production line running smoothly.

Available Conditions

Original New, Used, Copy New

Technical Specifications

Part Identification

- 783-3GT-9
- KLW-M9199-00

Key Components

Part Name	Part Number
Housing, Head	KHY-M7101-00
Plate, Bearing	KHY-M7113-00
Belt 1	KHY-M7131-00
Belt 2	KHY-M7132-00
AC Servo Motor	90K21-038011

Included Hardware Summary

- Hex Socket Head Bolts
- Flat Head Screws
- Plain Washers
- Set Screws
- Circlips
- Parallel Pins
