

SMT Belt Head for Yamaha YVL88

Replacement belt head designed for YAMAHA YVL88 pick and place machines. It ensures optimal performance in surface mount technology assembly processes.

Product Overview

High-Performance SMT Belt Head

This original, new SMT belt head is engineered for precision and reliability in pick and place assembly processes. It is fully compatible with YVL88 systems, ensuring optimal operational performance. This component is essential for maintaining high throughput and accuracy in surface mount technology manufacturing.

Identification

Component Condition

Original • New

Compatible Part Numbers

KG7-M7116-00X, KH5-M7116-00X
