

SMT Conveyor Belt for Yamaha YG12F

This conveyor belt is designed for Yamaha YG12F SMT equipment. It ensures precise and reliable component transport within the SMT assembly line.

Product Overview

Precision Conveyor Belt for YG12F

This original, high-quality conveyor belt is specifically engineered for use in advanced electronic assembly equipment. It ensures consistent and reliable component transport, helping to maintain high operational standards and minimize assembly line downtime. Designed for compatibility and durability, this component is essential for professional manufacturing environments.

Technical Specifications

Condition

Original • New

Part Number

KKD-M7131-00

Component Type

Conveyor Belt

Compatibility List

Additional Compatible Components

- Main Stopper Cylinder KV7-M9283-00X
- Leaf Spring KG7-M7137-A0X
- Sensor Head Assy KV8-M7160-020
- Piston KV8-M7104-00X
- Cylinder PBSA10*5 KV7-M9237-00X
- I&O Board Head KM1-M4570-00X
- X-axis Harness KM1-M665J00100
