

SMT Equipment Collar Bearing for YS12/YG12

Collar bearing designed for use in YAMAHA YS12 and YG12 SMT equipment. It plays a crucial role in positioning and alignment for smooth operation.

Product Overview

Precision Collar Bearing for SMT Assembly

This high-quality replacement collar bearing is specifically engineered for use in surface mount technology equipment. Designed to meet strict operational requirements, this component ensures consistent alignment and smooth movement for critical machine assemblies. It is an original new part, providing reliable performance for maintenance and repair of YS12 and YG12 series systems.

Product Details

Condition

Original • New

Part Number

KHY-M7108-00

Component Name

COLLAR, BRG

Compatibility

Supported Models

YS12, YG12

Material

Build Material

Metal
