Product Overview

High-Precision Component Feeder

This SMT feeder is engineered for pick and place machines to ensure the precise and reliable delivery of components during automated assembly. Built with durable materials to withstand demanding industrial environments, it helps optimize production efficiency and minimize downtime. The unit supports various component sizes and integrates seamlessly into existing high-speed surface mount technology lines.

Technical Specifications

Feeder Type	Electric SMT Feeder
Component Width	8 mm
Component Pitch	4 mm
Manufacturing Origin	Korea

Available Series

Supported SM Series

- 8mm Electric
- 8x2mm
- 8x4mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Accessories

Related Components

Feeder Motor, Control Board, Power Cord, Trolley, Calibrator
