

SMT Feeder for CP45FV Pick and Place Machines

This SMT feeder is designed for use with CP45FV pick and place machines. It is compatible with 0201 components and 8mm tape width.

Product Overview

Precision SMT Component Feeding

This high-precision feeder is engineered for seamless integration with pick and place assembly machines. Available in both original new and verified used conditions, it ensures consistent component delivery for demanding production environments. The unit is specifically optimized for 0201 component sizes, providing the reliability needed for high-speed SMT assembly processes.

Technical Specifications

Available Feeder Widths

- 8mm Electric
- 8*2mm
- 8*4mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Compatible Machine Series	CP45FV, CP45, CP30, CP60, CP40
