Product Overview

Precision-engineered loading unit for optimized feeder preparation.

Professional Feeder Setup Solution

This SMT feeder setup jig is specifically designed to streamline the loading and preparation process for electronic feeders. By facilitating accurate and efficient component setup, this unit helps reduce assembly line downtime and improves overall productivity. Its durable construction ensures reliable performance even in high-volume manufacturing environments.

Technical Specifications

Physical Dimensions	300 x 355 x 1070 mm
Gross Weight	10 kg
Feeder Capacity	2 units

Compatibility

Supported Feeder Tape Widths

- 8*2mm
- 8*4mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Compatible Series

CP Series, SM Series, SME Series, SM IT Series
