Product Overview

Precision SMT Gear Component

This high-precision gear is engineered specifically for use in advanced pick and place machinery. Constructed from durable steel, it is designed to withstand the rigorous demands of high-speed automated assembly environments. This component ensures accurate and reliable operation, contributing to the overall efficiency and longevity of your SMT production equipment.

Compatibility & Identification

Compatible Machine Series

- CM402
- CM602
- NPM

Part Numbers

N210050453AA, KXFA1LFAA01

Technical Specifications

Condition

Original New

Material

Steel

Logistics & Service

Standard Delivery Time
