

SMT Nozzle Maintenance Turbine Oil

This turbine oil is designed for maintaining SMT nozzles. It ensures smooth operation and extends the lifespan of critical parts.

Product Overview

Precision Maintenance Lubricant

This specialized turbine oil is engineered for the maintenance of high-precision Surface Mount Technology (SMT) components, including nozzles and internal machinery parts. It is formulated to ensure smooth operation, minimize friction, and maximize the operational lifespan of sensitive equipment. This essential maintenance fluid meets the rigorous standards required for reliable performance in automated assembly environments.

Technical Specifications

Origin

Made in Japan

Viscosity Grade

VG32

Manufacturer Part Number

KV8-M8870-00X

Compatibility

Associated Spare Parts

Component	Part Reference
Air Valve	KM1-M7163-20X
Air Joint	KG2-M3407-A0X
Air Gun Assembly	KU4-M8590-00X
Belt	KV7-M7176-00X

Compatible Series

YV100X, YV100XG, YV100II, YG200X
